Design Tools: Figma, Affinity Designer, Canva
UI/UX Skills: Wireframing, Prototyping, User Flow Design, Visual Design
Other Skills: Responsive Web Design, Graphic Design.

Languages: English | Hindi | Konkani | Marathi

PROJECTS

Cyberbullying and Hate Speech Detection: Developed a machine learning-based system to classify sarcasm and irony in online content, integrating text and image analysis (using CLIP) to improve cyberbullying and hate speech detection.

Easy Parking: Designed a user-friendly app that enables people to find, book, navigate to, and review parking spots with ease.

E-commerce App: Designed an e-commerce app with distinct skins for admins, sellers, and customers, focusing on navigation, visual hierarchy, and a smooth user experience aligned with best design practices.

Parallax Product Display: Designed a modern parallax-based product presentation that uses layered motion and depth to transform a simple steel bottle into a dynamic, visually immersive and engaging storytelling experience.

CERTIFICATES

- Figma Design Certification – LetsUpgrade
- Internship Certificate – Fluxatic Global
- HTML & CSS Bootcamp – LetsUpgrade
- Introduction to Python Programming – Red Hat
- SQL Certificate – LetsUpgrade
- Google UX Design Professional Certificate -Coursera
